Key benefits

At Remco we want people to enjoy everything that's great about a pool with minimum effort and cost. Our custom designed Swimroll cover is the ultimate automated option for turning a good pool into a really great one. If you have a pool or are designing one and want to get the most out of your investment, we can help.

We love our backyards in Australia. It's where our families relax, entertain, cook and enjoy our little piece of paradise. Pool covers should look beautiful and be easy to use. That's why our covers have won multiple awards.

★ AWARD WINNING DESIGN

Aesthetically pleasing, wonderfully functional, fully automated. Remco designed the Swimroll to provide all these things. Made with high-grade PVC or polycarbonate extrusions that interlock tongue-in-groove, the Swimroll is highly buoyant and creates a floating floor on the surface of the water. This delivers safety and insulation, while also keeping leaves and debris out of the pool so you can spend more time enjoying it rather than cleaning it.

🍃 CLEAN

When closed, Swimroll's tight custom fit ensures that any leaves, dirt and debris that fall onto the cover won't enter the pool. Then, when the Swimroll is automatically retracted, this material is fed into strategically positioned skimmer boxes. So Swimroll Pool Covers clean themselves!

📐 CUSTOM FITTED

Swimroll is custom-fitted to the exact needs of your pool or project. Each pool is laser measured by a trained Remco technician for a perfect fit to ensure that your cover meets your below or above ground requirement. Available in a variety of colours, our stylish below ground covers can be concealed when arranged prior to construction. For existing pools, we offer multiple design alternatives.

☀️ INSULATES & HEATS

Remco Swimroll Pool Cover Systems deliver industry-leading insulation values that are, on average, three times that of a typical pool blanket. Swimrolls' polycarbonate slats are specifically designed for heat absorption, so they actually heat your pool when in the sun. Combined with Swimroll's incredible insulation values, this ensures you will have the most energy efficient pool possible.

⚠️ SAFETY

When installed with an integrated safety ledge or retro-fitted safety rail, nothing can slip between the side of the pool and the Swimroll cover. The covers' rigid and buoyant panels stay on top of the water and can support up to 70kg. As an added safety precaution, Swimroll is also lockable via key switch.

♻️ INCREASES EFFICIENCY & SAVES WATER

Because Swimroll Pool Covers fit your pool perfectly, you save thousands of litres of water every year that would otherwise evaporate. Eliminating water loss means less water sanitising is required, reducing all pool water maintenance costs

*In Australia at this time Swimroll Automatic Pool Cover Systems do not replace the need for a security fence around your pool. Parental supervision is always recommended for children in the vicinity of any body of water. Swimroll is not to be relied upon as a safety cover.

Installation

There are Swimroll installation options to suit every pool and backyard. Swimroll can be seamlessly integrated into new pool constructions for the ultimate discreet fit, or retrofitted to existing pools in a non-obtrusive manner.

FOR NEW POOLS

A fully integrated installation is perfect for pool owners who want a cover that is completely concealed when not in use and retains the design integrity of the pool. If the Swimroll system is specified prior to construction, Remco will provide the architect or pool builder with construction requirements for a suitable underground housing.

IN-FLOOR

IN-SEAT

FOR EXISTING POOLS

Whether built into your existing pool or fitted on the deck of your pool on a stylish stainless steel roller, Swimroll retro-fit options are remarkably discreet. Each Swimroll is individually made and fitted according to laser pool measurement, ensuring a smooth and easy fit for pre-existing pools.

ABOVE GROUND

Form & function

EUROPEAN DESIGN

Swimroll panels interlock tongue in groove, and are hollow to ensure high buoyancy flotation and insulation of the pool water. Completely sealed, the panels create a floating floor on the surface of the water.

Swimroll creates a look with genuine style. That's why homeowners, architects and pool builders around Australia choose Swimroll to create beautiful, stylish pools with unparalleled functionality.

DELIVERY & INSTALLATION

Remco pool cover products are available for supply and installation right across Australia and come with a 5-year domestic parts warranty for assured performance and quality.
